Certificate of Analysis

SAN High Quality (Bioprocessing grade) (Triton FREE)

BATCH NO: 2004-5-B
Manufacture date: 2020.02.03
Expiry date: February 2022
Volume (ml): 1.3
Storage temperature: -20°C
Appearance: Clear liquid

ANALYSIS:		Result
Assay date: 2020.02.03	Volume activity (Units/ μ l) ¹	386
	Protein (Bio-Rad/Bradford), (mg/ml)	0.98
	Total activity (Units)	501 800
	Specific activity (Units/mg)	393 878
	Purity (%)	> 98
	Protease content	Not detected (1000 U)
	Aerobic bacteria count	< 10 CFU in 100 kU
	Yeast and mould count	< 10 CFU in 100 kU
	Endotoxins (LAL-test)	< 0.25 EU in 1 000 U

BUFFER COMPOSITION:	COMPONENT	Conc.
	Bis-Tris, pH 7.0 (25°C)	25 mM
	MgCl ₂	5 mM
	NaCl	500 mM
	Tween 20	0.01 % (v/v)
	Glycerol	50 % (v/v)

DECLARATION OF ORIGIN

Salt-Active Nucleases (HL-SAN/SAN HQ/SAN HQ Triton Free)

Heat Labile Salt-Active Nucleases (HL-SAN/SAN HQ/SAN HQ Triton Free) are highly purified enzymes (proteins) derived from a *Pichia pastoris* yeast culture that has been genetically modified by a microbial gene coding for a nuclease enzyme. The products are free of genetic material and consists solely of the specified enzymes, dissolved in a stabilizing aqueous solution of composition as specified on the accompanying Certificate of Analysis. The enzymes are intended for use in research. The total protein content is less than 100 mg. The materials are sterile filtered and are not harmful, toxic or infectious.

The materials are manufactured in Norway.

We declare that the materials consist only of yeast derived biological material, and ***are free of any animal derived products***. The production organism does not contain genes or express antigens of livestock or poultry disease agents. The materials are free of transport media or stabilizers derived from equine, ruminant, swine or avian species or materials.
